PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 4+ years of experience designing, building and deploying scalable web applications using **MERN/MEAN, and Django** stacks. Skilled in **JavaScript/TypeScript, React, Angular, Node.js, AWS, REST APIs, CI/CD** and team leadership; consistently deliver high-performance, secure solutions and mentor engineers to elevate code quality.

PROFESSIONAL EXPERIENCE

- **Neosoft Technologies Pvt. Ltd.** Mumbai, Maharashtra
Full-Stack Developer (Dec 2025 – Present)
 - **Highlights**
 - **Client Delivery:** Delivered requirement-driven features and products for multiple clients while maintaining alignment with business and user requirements.
 - **Performance:** Reduced page interaction latency by **25%** through reusable React.js components and a custom design system.
 - **Backend Optimization:** Reduced API response time by **35%** by optimizing Node.js microservices, database queries, and caching strategies.
 - **Projects**
 - **Fynd – Catalog Cloud (Jan 2026 - Present)**
 - *Node.js, React.js, MongoDB, PostgreSQL, ClickHouse, Docker, Azure DevOps*
 - **Enterprise Catalog:** Contributed to a platform supporting product discovery and inventory synchronization for **1,000+ brands**.
 - **Analytics Optimization:** Optimized ClickHouse analytics queries, reducing report generation time by **35%**.
 - **Dashboard Development:** Built React.js dashboards and reusable components for real-time catalog insights and business workflows.
- **Amenses Innovation Pvt. Ltd.** Indore, M.P.
Senior Web Developer (Jun 2023 – Dec 2025)
 - **Highlights**
 - **Site Performance:** Led development of three responsive web applications using MERN and MEAN stacks, improving load times by **40%** and reducing bounce rates by **25%**.
 - **Client Delivery:** Delivered requirement-driven products for **3+ clients**, ensuring alignment with functional and technical requirements.
 - **Scalability:** Implemented a multi-tenant architecture supporting **10,000+ users** with reliable performance across devices.
 - **Mentorship:** Mentored junior developers through code reviews and technical guidance, improving team delivery efficiency by more than **20%**.
 - **Projects**
 - **Sancover App (Jun 2025 - Dec 2025)**
 - *Electron.js, React.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Chart.js*
 - **Music Management Platform:** Contributed to a desktop-based music-industry management and analytics platform for labels, artists, and internal teams, supporting releases, artists, playlists, labels, campaigns, HR planning, task management, vaults, and reporting workflows.

- **Real-Time Analytics:** Built React.js dashboards and analytics screens with Supabase real-time subscriptions, Chart.js visualizations, filtering, search, tagging, KPI widgets, playlist health monitoring, campaign tracking, and CSV/XLSX export workflows.
 - **Security and Data Architecture:** Designed and refined Supabase PostgreSQL schemas for 10,000–100,000+ records, implemented JWT-based authentication and role-based access control with Row-Level Security, and developed Edge Functions for AI health scoring, duplicate detection, playlist monitoring, and risk analysis.
 - **File Management and Reporting:** Implemented Supabase Storage workflows for media, file-management, bookkeeping, and vault modules with encrypted fields and secure access policies. Developed Excel/PDF export functionality for releases, analytics, campaign tracking, and audit logs.
- **Fleet Management System (Feb 2025 - June 2025)**
 - *React, Redux, Node.js, PostgreSQL, WebSockets, JWT*
 - **Real-Time Tracking:** Developed vehicle, driver, trip, maintenance, and reporting modules with GPS and WebSocket-based live tracking.
 - **Performance:** Optimized data handling and WebSocket communication to maintain responsive dashboards under heavy traffic.
 - **Frontend Architecture:** Implemented centralized Redux state management, interactive dashboards, search, filtering, and chart-based operational insights.
- **Ubuntu Interior Web App (Dec 2024 - Feb 2025)**
 - *Next.js 15, React, Node.js, Express.js, MongoDB, AWS, Stripe*
 - **Product Platform:** Built authentication, design gallery, project dashboard, estimates, billing, vendor management, and client communication workflows.
 - **Backend Engineering:** Designed secure REST APIs and MongoDB schemas for users, projects, design assets, communications, and quotations.
 - **Collaboration Workflows:** Implemented role-based access control, secure file management, real-time notifications, and performance improvements for high-traffic modules.
- **EasyMB.in (Jun 2024 - Nov 2024)**
 - *Next.js 14, Express.js, MongoDB, AWS, Redux, React Query*
 - **Technical Platform:** Built a technical blogging and repair-guide platform with user, admin, subscription, profile, guide, and content-management modules.
 - **Search Engineering:** Implemented global search across device brands, component names, models, and article metadata using MongoDB aggregation.
 - **Application Security:** Developed role-based access control, secure file management, validated APIs, and responsive SSR/SSG-based user experiences.
- **Payroll Application (Jun 2024 - Mar 2025)**
 - *Angular 17, NgRx, Node.js, PostgreSQL, TypeScript*
 - **Payroll Workflows:** Developed salary distribution, payslip, salary breakdown, tax, investment, employee, and organization-management modules.
 - **Multi-Tenant Access:** Implemented organization and sub-organization support with permission-based access for Accounts, Employees, HR, and administrators.
 - **Frontend State:** Built Angular dashboards and centralized NgRx state management with role-based feature visibility and validation.
- **7VowsWed (Jan 2024 - Jun 2024)**
 - *Next.js 13, Node.js, Express.js, MongoDB, Redux, AWS*
 - **Multi-Tenant Platform:** Built a wedding event-management platform supporting user, admin, and vendor workflows for bookings, events, queries, and subscriptions.

- **Admin and Vendor Modules:** Developed dynamic filter management, vendor onboarding, profile management, service management, and query-management workflows.
- **Scalable APIs:** Implemented role-based access control, MongoDB schemas, REST APIs, WebSocket notifications, and SSR/SSG for efficient data delivery.

- **Hayat Finance – Digital Bank (Jun 2023 - Nov 2023)**

React, Redux, TypeScript, React Query, JWT, WebSockets

- **Frontend Migration:** Re-engineered legacy banking interfaces into a modular React and Redux architecture for account overview, transfers, and transaction tracking.
- **Real-Time Data:** Integrated REST APIs and WebSockets for live transaction, balance, and notification updates without page reloads.
- **Quality and Performance:** Improved component maintainability, rendering performance, Lighthouse scores, integration validation, and release stability.

INTERNSHIP EXPERIENCE

- **Edvak Inc.** Hyderabad, Telangana
SDE Intern (Jun 2022 - May 2023)
 - **Highlights**
 - **EHR Module:** Developed patient-management workflows and reduced scheduling errors by **30%**.
 - **ML Integration:** Collaborated with the ML team to integrate speech-to-text functionality into healthcare workflows.
 - **Third-Party Integrations:** Implemented Twilio messaging and Nodemailer email services for automated communication workflows.
 - **API Development:** Built and optimized REST APIs, resolved production defects, and supported stable release delivery.
 - **Projects**
 - **EHR Application (Jun 2022 - May 2023)**
Angular 10/12/14, NgRx, NestJS, Node.js, MongoDB
 - **Patient Management:** Developed patient registration, medical-history, family-history, appointment, and report-generation workflows.
 - **Clinical Productivity:** Implemented text-to-speech note capture and an EMR calculator based on medical codes.
 - **API Optimization:** Optimized patient-list APIs for up to **50,000 records** within approximately **one second** and corrected dashboard statistics flows.

PERSONAL PROJECTS

- **CV Builder (Jan 2026)**
Nx 22, TypeScript, MERN, React 19, Vite, Material UI, Playwright, Yarn 4.12
 - **Monorepo Architecture:** Built a full-stack CV-builder application in an Nx monorepo using **TypeScript, React, Vite, Express.js, MongoDB, and Yarn 4.12**.
 - **CV Creation Workflow:** Implemented **JWT and Google/Facebook OAuth authentication**, dashboard-based CV management, reusable layouts, and a stepped editor for personal details, education, experience, projects, skills, and social profiles.
 - **Quality and Security:** Added live CV preview, responsive Material UI components, form validation, secure

headers, rate limiting, password hashing, API validation, Zustand persistence, and **Playwright end-to-end coverage**.

EDUCATION

- **Symbiosis University of Applied Sciences** Indore, M.P.
B.Tech in Computer Science & Information Technology; CGPA: 8.98 (Aug 2019 – May 2023)

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL
- **Frontend:** React.js, Electron.js, Next.js, Angular, Redux, Zustand, RxJS, NgRx, Vite, Material UI, Tailwind CSS, Shaden UI
- **Backend:** Node.js, Express.js, NestJS, Django, Django REST Framework, REST APIs, Supabase Edge Functions
- **Databases:** PostgreSQL, Supabase PostgreSQL, MongoDB, MySQL, ClickHouse, DynamoDB
- **Authentication and Security:** Supabase Auth, JWT, OAuth 2.0, Row-Level Security, RBAC, Passport.js, Bcrypt, Helmet
- **Storage and Integrations:** Supabase Storage, Supabase Realtime, Spotify API, YouTube API, IP Reputation APIs
- **Data Visualization and Reporting:** Chart.js, CSV/XLSX Export, Excel/PDF Reporting
- **Testing:** Jest, Vitest, React Testing Library, Playwright, SonarQube
- **Cloud and DevOps:** AWS EC2, AWS S3, AWS Lambda, Elastic Beanstalk, Docker, GitHub Actions, Azure DevOps, CI/CD
- **Practices:** Git, Code Review, Agile, Scrum, Database Indexing, Query Optimization, Real-Time Data Handling
